

Red Claw: Raising the Giant Australian Crayfish, 1995, Don R. Wilson, 0963152637,
9780963152633, Atlas Publications, 1995

The Red Claw is a new and very promising aquaculture species here in America. This book is one of the few sources for complete information on all aspects of the culture of this lobster-sized freshwater crayfish. Compiled from leading-edge research direct from Australia and Auburn University as well as individual findings all over the U.S. this book dispels the 'hype' and furnishes the facts about this little known but highly prized aquaculture species. Fish farmers have managed to become major players in this bottomless market in only a couple of years, and small scale family run operations are harvesting 'short lobsters' in less than a year. Stock prices have fallen dramatically in 2 years, and as a result the startup costs are greatly reduced now. Included in the book contents are photos from 'Down Under', food and feeding regimens needed to raise the Red Claw to giant size, well managed pond factors, hatching and juvenile production, stocking methods, and some marketing, sale and processing tips.
